Letter of Statement for Professor Vassilis G. Gorgoulis

I am writing this Letter of Statement to underline the substantial role of Professor Vassilis G. Gorgoulis in the fulfillment of the recently published paper in Nature Communications entitled “**Mutant p53 cancers reprogram macrophages to tumor supporting macrophages via exosomal miR-1246**” [Nat Commun. 2018 Feb 22;9(1):771. doi: 10.1038/s41467-018-03224-w]. Professor Vassilis G. Gorgoulis and his team played a vital role in the assembly of the manuscript, providing expert pathology contribution and significant experimental and conceptual support. Therefore, I consider him as co-senior in this publication.

Sincerely,
